

InventHelp Client's Accessory Makes Carrying a Baby in a Car Seat Easier (VET-422)

A leading invention submission company, InventHelp is submitting the CAR SEAT SLING to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) December 04, 2016 -- An inventor from Bullhead City, Ariz., wants to facilitate the difficult task of taking care of a baby on a daily basis. "After seeing my girlfriend have trouble carrying our baby in a car seat, I decided to think of something to help her and other parents of babies out," he said. "That's when I came up with the CAR SEAT SLING."

Producible in design variations, this accessory enables a user to carry a baby in a car seat from site to site in an easier, more ergonomic manner. It also makes carrying the car seat hands-free. As a result, it avoids struggle and hassle, as well as prevents strain.

The inventor has created a prototype of his idea.

The original design was submitted to the Las Vegas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-VET-422, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
