

InventHelp® Client Patents “Vehicle Attachable Carrier Device” – Unique Cargo Apparatus Invented

InventHelp, founded in 1984, is submitting the Vehicle Attachable Carrier Device to interested companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 30, 2016 -- [InventHelp](#), a leading inventor service company, announces that one of its clients, an inventor from Utah, has designed a special bumper that could allow for the easy storage and transport of a variety of items. This invention is patented.

“Vehicle Attachable Carrier Device” could mount on the front of a pickup truck/SUV or other heavy-duty vehicle to work as a grill guard. The unit would flip downward and outward to be used as a platform when needed. The apparatus could eliminate the need to use the interior or the roof of a vehicle, which would prevent hassles and messes. The invention is designed to be used for both professional and recreational use. Vehicle Attachable Carrier Device would be ideal for use to carry a box, gear, game animals and more.

The Vehicle Attachable Carrier Device unit would be producible from steel. The unit is a grill guard that features a fold-out platform, a spring-loaded pivot point, and an air scoop for cooling. The unit would mount to the front or rear of the vehicle. When needed, the unit could fold downward and outward. Items could then be secured to the platform.

[InventHelp](#) is attempting to submit the invention to companies for review. If substantial interest is expressed, the company will attempt to negotiate for a sale or royalties for the inventor. For more information, telephone Dept. 12-STU-1883 at (800) 851-6030.

Manufacturers interested in reviewing additional inventions and new product ideas can contact InventHelp’s marketing partner Intromark by filling out an online request to review new product ideas [here](#).
