

InventHelp Invention Provides an Alternative to Trailers for Vehicles (ALL-904)

A leading inventor service company, InventHelp is submitting the 6 WHEELS ON WHEELS to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 05, 2016 -- Having to rely on a trailer for extra storage and hauling capacity for a vehicle is expensive, especially due to the registration and tag costs involved. But many vehicle owners find themselves in situations that require more space than their vehicles have. "What is needed, I decided, is an alternative way to do this," said an inventor from Fayetteville, Ga.

The 6 WHEELS ON WHEELS makes storage and transport of items via a vehicle more convenient. It expands the carrying capacity without the need for an attached trailer, which eliminates the need for registration and tagging, which saves time, effort and money.

Versatile, space-saving, ergonomic and easy to use, the 6 WHEELS ON WHEELS also is producible in many design variations. A prototype model of this idea is available upon request.

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-ALL-904, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
