

## **Inventor and InventHelp Client Designs Alternative Way to Transport Items Via Car (BTM-2345)**

*A leading inventor service firm, InventHelp is submitting the WHEEL BAG to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 07, 2016 -- Very often, in many areas of the world, motorists are burdened with the task of transporting things that aren't suitable for being placed inside a vehicle. Owning a truck is a reliable solution to this problem, but people who don't own trucks and don't have roof racks are stuck not knowing what to do to solve this problem.

"The answer is our idea," said one of two inventors from Tortola, Virgin Islands. "We've designed a special storage bag that is secured to the spare tire in order to save space and avoid inconveniences."

The patent-pending WHEEL BAG allows for storage and transport of items that aren't suitable for vehicle interiors conveniently, sanitarily and inconspicuously. This avoids the risk of messes and hassles, as well as saves space. Overall, it promotes comfortable and enjoyable commutes.

Durable, weatherproof, affordable, versatile and user-friendly, the WHEEL BAG holds garbage, salty swim wear, snorkeling gear, etc.

The original design was submitted to the Baltimore office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BTM-2345, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
