

InventHelp Inventor Develops Anti-Glare Automotive Accessory (CBA-2948)

InventHelp is attempting to submit the W.C. SHIELDS to appropriate companies in the hopes of their good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 07, 2016 -- "I thought that advances in technology could be put to good use in lessening the intensity of sunlight and glare in automobiles," said an inventor from Augusta, Ga. "I came up with this idea so that harsh sunlight would not blind the driver or harm the vehicle interior."

He developed the W.C. SHIELDS to shield the driver from harsh, blinding sunlight. This enables the driver to see the road ahead clearly. The invention helps the driver focus on the road in order to improve safety. The accessory also prevents sunlight from damaging the vehicle interior and upholstery. All of this provides added peace of mind. Furthermore, the system is adaptable for use with both new and existing vehicles.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CBA-2948, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
