

## **Inventor and InventHelp Client Creates Vehicle Purse Accessory (CBA-2997)**

*InventHelp, a leading invention submission firm, is submitting the TUCK AWAY to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 07, 2016 -- An inventor from Easley, S.C., wanted to fulfill the need for improved organization and stability for a woman's purse while driving.

The TUCK AWAY keeps a bag secure in a neat and convenient position in front of the front passenger seat and will sit on the floor. It helps protect a purse by tucking under the seat for security, if needed. It also prevents small belongings from being scattered about on the floor with sudden stops or turns and it is easy to remove if a passenger in the front seat needs more room. Additionally, it has a simple and lightweight design. The TUCK AWAY is user friendly, affordable, and adaptable. It attaches to the front side of the front passenger seat and can match the interior of the car, making it less visible.

“I was tired of standing on my head to find items under the seat when my purse falls over,” said the inventor.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CBA-2997, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
