

InventHelp Inventor Creates Motorcycle Safety Device (CCT-3019)

Based in Pittsburgh, Pa., InventHelp is working to submit the LIFE LIGHT to companies for their possible consideration.

PITTSBURGH, PA ([PRWEB](#)) December 07, 2016 -- An inventor from Seven Mile, Ohio, wanted to fulfill the need for improved motorcycle visibility.

The LIFE LIGHT promotes added safety and peace of mind. It allows drivers to easily identify a rider at busy intersections and in blind spots. It also decreases the chances of a motorcyclist being overlooked by distracted or daydreaming drivers. Additionally, it also decreases the chances of an accident. The LIFE LIGHT could be used in conjunction with both aftermarket and new-production motorcycles.

“I had a brother that was in a motorcycle accident and it made me think of this idea,” said the inventor.

The original design was submitted to the Cincinnati office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCT-3019, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
