

MUFFLER UMBRELLA Invented by InventHelp Clients (HUN-248)

A leading invention submission company, InventHelp is submitting the MUFFLER UMBRELLA to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 09, 2016 -- Two inventors, from Humble, Texas, thought there needed to be a safe way for vehicles to escape high water situations like flooding, so they invented the patent-pending MUFFLER UMBRELLA.

The MUFFLER UMBRELLA provides unrestricted engine exhaust flow in high water situations. In doing so, it helps to prevent an engine from stalling out or flooding. As a result, it enhances safety and it provides added peace of mind. The invention features a portable design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the MUFFLER UMBRELLA is producible in design variations.

The inventors described the invention design. “Our design provides an effective way to prevent water intake.”

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HUN-248, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
