

Inventor and InventHelp Client Devises Disable Vehicle Mover (JMC-1888)

InventHelp is submitting the CAR GETTER to appropriate companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) December 10, 2016 -- An inventor from Azle, Tex., wanted to fulfill the need for a machine for quickly and easily moving disabled vehicles.

The patent-pending CAR GETTER prevents one from having to call or own a wrecker. It is user friendly, reliable, cost effective, and safe. It also allows for the controlled movement of vehicles for service, repairing, or rearranging in cramped parking spaces. Additionally, it is useful in a variety of commercial applications.

“I wanted to devise a better way to move disabled vehicles,” said the inventor.

The original design was submitted to the Telemarketing office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-JMC-1888, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
