

## **InventHelp Inventor Develops Safety Equipment for Grate/Floor Work Openings (KOC-254)**

*InventHelp, a leading inventor service company, is submitting the UNDER GRATE/FLOOR ACCESS SYSTEM to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 10, 2016 -- "I recognized a need for a physical safety restraint while on the job to prevent injuries due to trips or falls," said an inventor from Tottenham, Ontario, Canada. "To provide workers with added safety and security, I devised this access system for the floor grate of an automotive paint booth, but really it can be used in any work environment."

He developed the patent-pending UNDER GRATE/FLOOR ACCESS SYSTEM to offer more convenient access to the sub floor of a work environment. The device enables the user to access the under grates of any work environment. The portable, all-in-one design ensures that there is not a large open hole in the floor, which avoids trip-and-fall hazards. Furthermore, the invention reduces the risk of injuries, which is designed to enhance personal safety.

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-KOC-254, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
