

DB EZ PARK Invented by InventHelp Client (MTN-2693)

InventHelp, founded in Pittsburgh in 1984, is submitting the DB EZ PARK to companies for their possible consideration.

Pittsburgh, PA ([PRWEB](#)) December 11, 2016 -- An inventor, from Brooklyn, N.Y., thought there needed to be an easier way to parallel park a car in a tight spot, so she invented the DB EZ PARK.

The DB EZ PARK provides a simplified way to parallel park. In doing so, it helps to prevent frustrations and minor accidents. As a result, it saves time and effort and it enhances safety. The invention features a user-friendly design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the DB EZ PARK is producible in design variations.

The inventor described the invention design. “My design eliminates the need to continuously maneuver a vehicle back and forth when parallel parking.”

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-MTN-2693, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
