

Improved GPS Invented by InventHelp Client (NJD-1314)

InventHelp is working to submit the E Z DIRECTIONS to companies in the hopes of their good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 12, 2016 -- An inventor from Hazlet, N.J., wanted a more convenient way to use a Portable Global Positioning System (GPS). As such, they invented the patent-pending E Z DIRECTIONS for use by owners and operators of vehicles while traveling. E Z DIRECTIONS guides drivers to distant or unfamiliar addresses in the most efficient manner possible.

The inventor was inspired by their own experience. “It is difficult and cumbersome to type information into a GPS while driving; I thought there had to be a safer, more convenient way to accomplish this task.” The invention spares drivers the awkward operation of a touch screen. It increases convenience and safety, therefore reducing stress and anxiety for drivers.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1314, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
