

## **InventHelp Inventor Develops Bed Leveler for Sleeper Cabs (PND-4726)**

*Pittsburgh-based InventHelp is attempting to submit the HYDRAULIC SLEEPER LEVELER to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 13, 2016 -- "As a truck driver, sometimes I cannot find a level place to park, which means my bed is not level, making it hard to sleep," said an inventor from Berlin, N.J. "In order to keep my bed level no matter where I parked, I came up with this system."

She developed the patent-pending HYDRAULIC SLEEPER LEVELER to automatically level the bed. This enables the trucker to get a restful sleep. It eliminates the need to drive around until a level parking space can be found. The system is ideal for use when parking on uneven terrain. It provides added peace of mind. Additionally, the invention is adaptable for use with both new and existing sleeper cabs.

The original design was submitted to the Philadelphia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-PND-4726, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
