

InventHelp Inventor Develops Accessory for Vehicles with Rear-Reversing Cameras (SKC-187)

InventHelp, a leading inventor firm, is submitting THE CLEAR VIEW to appropriate companies for their review.

Pittsburgh, PA ([PRWEB](#)) December 15, 2016 -- "Reverse cameras are useless or interfered with during inclement weather," said an inventor from Upper Marlboro, Md. "In my research, I found that in 2018, all new vehicle models will be mandated by the federal government to have reverse cameras as mandatory features. I came up with this idea to prevent potential safety issues."

He developed the patent-pending THE CLEAR VIEW to prevent inclement weather conditions from interfering with the reverse camera. The unit provides a clear view of what is going on behind the vehicle. It ensures that the reverse camera functions properly in all weather conditions. The accessory eliminates glare, water, snow, dirt & dust particles, and prevents against scratches & scuffs. It is designed to enhance roadway safety. Additionally, the invention is adaptable for use with new and existing vehicles.

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SKC-187, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
