

Inventor and InventHelp Client Creates Protective Vehicle Covering (WDH-997)

Pittsburgh-based InventHelp is working to submit this idea, the BAMV SHADE, to appropriate companies for their review.

Pittsburgh, PA ([PRWEB](#)) December 15, 2016 -- An inventor from Washington, D.C., wanted to fulfill the need for a snow and ice covering for the top of a vehicle parked outside. It is usable in summer as well.

The BAMV SHADE reduces one's exposure to the elements. It is durable, resilient, and waterproof. It is also easy to use and safe. Additionally, it saves time and effort. The BAMV SHADE could also be used all year long to intercept airborne dirt, bird droppings, UV sunlight rays, and dust.

"I wanted to design a cover that would help save time in the winter by preventing one from having to clean snow and ice off of a vehicle every morning," said the inventor.

The original design was submitted to the Washington D.C. office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-WDH-997, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
