

Inventor and InventHelp Client Develops Convenient Tire-Inflation System (CCP-1146)

A leading invention firm, InventHelp is submitting this idea, the MULTI AIR INFLATOR, to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 17, 2016 -- "I was filling up my tires with air, and I thought that there had to be a quicker, less strenuous way to do this job," said an inventor from Chicago, Ill. "I devised this invention in order to speed up the process of inflating tires."

He developed the MULTI AIR INFLATOR to provide a quicker, easier way to inflate tires. The system allows all four tires to be inflated simultaneously. This saves time and effort for busy mechanics and motorists. The design eliminates the need to kneel or crouch in order to inflate tires, which reduces physical stress and strain. Furthermore, the invention is adaptable for use with new and existing vehicles.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCP-1146, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
