

InventHelp Inventor Develops Vehicle Reminder for Concerned Parents/Caregivers (DLL-3119)

Based in Pittsburgh, Pa., InventHelp is submitting the GUARDIAN ANGEL to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 19, 2016 -- ."My heart cries every time I hear on the news that a child has died because they were left in the car during the extreme hot or cold months and died a slow, torturous death," said an inventor from The Colony, Texas. "This alarm will save lives."

She developed the GUARDIAN ANGEL to remind parents and caregivers to remove the child from the back seat after arriving at their destination. The system prevents a child from being left in a vehicle unattended. This helps reduce injuries and deaths caused by exposure to extreme temperatures. It is designed to enhance personal safety and also offers added peace of mind. Furthermore, the invention is adaptable for use with any new or existing vehicle.

The original design was submitted to the Dallas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-DLL-3119, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
