

## **Alternative Restraint System Allows For Safer Transport of Injured People by First Responders - Designed by InventHelp Client (HLW-1736)**

*A leading invention submission firm, InventHelp is submitting the FIRST RESPONDER VEHICLE RESTRAINT to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 19, 2016 -- Police, emergency workers and military personnel are often faced with the duty of moving injured individuals to a safer location or a place of medical treatment, but it's not always easy or safe for them to do so, let alone safe for the victim being transported. "In order to solve these problems, I conceived of the patent-pending FIRST RESPONDER VEHICLE RESTRAINT," said a concerned inventor from Miami Beach, Fla.

This device allows for quicker, more ergonomic and safer transport of an injured individual. It avoids strain and risk of injury of responders, and it also keeps the injury victim safer. Overall, it promotes peace of mind.

Durable, reliable, portable and versatile, the FIRST RESPONDER VEHICLE RESTRAINT features an easy-to-use design, and it's ideal for police, firefighters, emergency workers or military personnel.

The original design was submitted to the Hollywood office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HLW-1736, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
