

JOHNNY JUMP START Invented by InventHelp Client (AVZ-1420)

Based in Pittsburgh, Pa., InventHelp is submitting the JOHNNY JUMP START to companies for their consideration.

Pittsburgh, PA ([PRWEB](#)) December 16, 2016 -- An inventor, from Santa Fe, N.M., thought there needed to be a way to jump-start your own car without assistance, so he invented the JOHNNY JUMP START.

The JOHNNY JUMP START provides an effective way to jump-start a vehicle. In doing so, it eliminates the need to ask for help. As a result, it saves time and effort, and it could help to prevent delays. The invention features a portable design that is convenient and easy to use, so it is ideal for vehicle owners. Additionally, the JOHNNY JUMP START is producible in design variations.

The inventor described the invention design. “My design offers a more convenient way to recharge a car battery.”

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-AVZ-1420, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
