

## **InventHelp Inventor Develops Oil-Changing Accessory for Convenience and Safety (NJD-1312)**

*Based in Pennsylvania, InventHelp is submitting the CLEAN CHANGE to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 22, 2016 -- "When I changed my oil, I got oil all over the place, which made such a tough mess that I had to clean up," said an inventor from Irvington, N.J. "In order to avoid any drips, spills, splatters or other hassles, I came up with this idea to make changing the oil a breeze."

He developed the CLEAN CHANGE to automatically remove oil from the engine. The accessory provides a clean and safe way to change the oil. It prevents oil from spilling or dripping and creating a mess. This keeps the driveway, garage floor or ground free from oil slicks and stains. The invention makes the entire process of changing engine oil simpler and easier. Additionally, it offers added peace of mind.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1312, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
