

Inventor and InventHelp Client Designs Improved Child Car Seat (OCC-1147)

A Pennsylvania-based invention submission company, InventHelp is submitting the VEHICLE INTEGRATED SAFETY CHILD SEAT to companies for review.

PITTSBURGH, PA ([PRWEB](#)) December 22, 2016 -- An inventor from San Bernardino, Calif., wanted to fulfill the need for an integrated child car seat for passenger vehicles.

The VEHICLE INTEGRATED SAFETY CHILD SEAT prevents a car seat from being forgotten. It also prevents parents and caregivers from having to struggle with the awkward and sometimes strenuous task of lifting and securing a child car seat. Additionally, it promotes peace of mind and increases safety.

“I wanted to design a car seat that would be a functional, convenient and space-efficient alternative to standard child seats,” said the inventor.

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCC-1147, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
