

InventHelp Inventor Develops Truck-Bed Kit for Securing Cargo (OCM-1115)

InventHelp, founded in 1984 in Pittsburgh, is submitting the MONKEY GRABS to appropriate companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 23, 2016 -- "I wanted more tie-down points available in my truck bed. When I have to carry loads of different sizes, I want to be able to stabilize them safely," said an inventor from Corona, Calif. "This led me to develop this convenient, safety-enhancing system."

He developed the patented MONKEY GRABS to turn four standard tie-down points into 24 tie-down points. This enlarges the carrying capacity of the truck bed. It allows loads to be stabilized more securely. The kit prevents cargo from sliding around the bed during transport. It is designed for additional safety. Furthermore, the kit is adaptable for use with both new and existing trucks.

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCM-1115, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
