

BRUISER BUG DEFLECTOR/ ROCK GUARD Invented by InventHelp Client (STU-2134)

InventHelp, founded in 1984 in Pittsburgh, is submitting the BRUISER BUG DEFLECTOR/ ROCK GUARD to companies for review.

PITTSBURGH, PA ([PRWEB](#)) December 26, 2016 -- An inventor, from Ogden, Utah, thought there needed to be an improved way to prevent bugs and rocks from hitting a truck's windshield, so he invented the patent-pending BRUISER BUG DEFLECTOR/ ROCK GUARD.

The BRUISER BUG DEFLECTOR/ ROCK GUARD provides an effective way to deflect insects and rocks from the front hood of a truck. In doing so, it offers an alternative to traditional bug deflectors. As a result, it enhances safety and it ensures that the front windshield remains clear. The invention features a durable and attractive design that is convenient and easy to use so it is ideal for truck owners. Additionally, the BRUISER BUG DEFLECTOR/ ROCK GUARD is producible in design variations and a prototype is available.

The inventor described the invention design. "My design offers a convenient and easy way to deflect insects and rocks."

The original design was submitted to the Salt Lake City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-STU-2134, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
