

Inventor and InventHelp Client Designs Convenient Sun Protection for Tires (VET-456)

InventHelp, founded in 1984, is submitting the TIRE SHADES to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) December 27, 2016 -- As a tow-truck driver in Las Vegas, an inventor from Henderson realized that about 60 percent of his tow jobs are due to tire blowouts. The extremely hot sunlight breaks down tires and makes them vulnerable to sidewall blowouts. In order to combat this dangerous and expensive problem he conceived of the TIRE SHADES.

This invention helps maintain tire integrity for longer periods by providing protection against extremely hot sunlight. This saves time, effort and money, as well as promotes safety and peace of mind.

Lightweight, durable, easy to use and producible in many design variations, the TIRE SHADES is designed to avoid tire breakdown and sidewall blowouts, which is ideal for all drivers.

The original design was submitted to the Las Vegas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-VET-456, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
