

Reduce Pit-Stop Time With QUICK WHEEL CHANGE - Designed by InventHelp Client (ROH-266)

InventHelp, a leading inventor service firm, is submitting the QUICK WHEEL CHANGE to companies for their possible consideration.

PITTSBURGH, PA ([PRWEB](#)) January 10, 2017 -- Race cars have to make pit stops in order to have their wheels changed and other vital things attended to as quickly as possible. After observing the activity in a racing pit stop, an inventor from Albion, N.Y., decided that there should be a way to change tires more swiftly in order to save racing time. That's when he came up with the idea for the QUICK WHEEL CHANGE.

This new method provides a way to reduce wheel-changing time in a pit stop. It frees up more time for other repairs and adjustments, as well as racing. As a result, it saves time and effort, as well as promotes efficiency.

Ergonomic, easy to use and producible in different sizes and wheel types, the QUICK WHEEL CHANGE also can be extended to civilian and industrial vehicles.

The original design was submitted to the Rochester office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-ROH-266, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
