

## **Trucking Ratchet Organizer Invented by InventHelp Client (CIC-213)**

*A leading invention submission company, InventHelp is submitting the RATCHET HOLDER to companies for their possible feedback.*

PITTSBURGH, PA ([PRWEB](#)) March 30, 2017 -- Ratchets are utilized by truck drivers to secure heavy loads, but can be cumbersome to manipulate and difficult to carry. Unfortunately for truck drivers, they can result in pinched fingers, thrown out backs and other injuries associated with these heavy metal objects.

An inventor from Hobart, Ind., has invented the patent-pending RATCHET HOLDER, a device that helps organize and carry ratchets used in the trucking industry. "As a truck driver, I was inspired by my own personal experiences to invent a device that makes it easier to both store and move ratchets," said the inventor. He then created a prototype. RATCHET HOLDER allows for the quick and easy removal of a ratchet as needed by the truck driver.

This device improves efficiency in the trucking industry and helps reduce labor time and exposure to adverse weather conditions.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CIC-213, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
