

InventHelp Inventor Develops Versatile Transportation Machine (KOC-292)

A leading inventor service company, InventHelp is submitting the BUMBLEBEE BY LUGADEMGO to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) April 03, 2017 -- "After a long day at work, I went for a walk with my dawdling 3-year-old granddaughter and an overzealous 100-pound Russian Retriever," said an inventor from Red Lake, Ontario, Canada. "I thought that there had to be a more efficient and less strenuous way for us all to get around."

He created a prototype for the BUMBLEBEE BY LUGADEMGO to serve as a versatile vehicle that accommodates a wide variety of uses. It can be custom-tailored to meet individual needs. The invention is usable as a dog trainer with cargo bed or child seat, personal electric golf cart, electric stroller or wheelchair, interactive soapbox racer, or millwright and workman's cart. Also, it can be used as an electric wheelbarrow, quiet hunter's buggy, shopping basket, exercise equipment, 4-wheeler and snowmachine tow-behind, and all-around step saver and mobility aid for the elderly and/or physically disabled. The invention features endless possibilities. Furthermore, it is made of durable components for long-lasting use.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-KOC-292, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
