

Inventor and InventHelp Client Develops Protective Accessories for Windshield Wipers (LGI-2333)

Founded in 1984, InventHelp is submitting THE WIPER DIAPER to applicable companies for their review.

PITTSBURGH, PA ([PRWEB](#)) April 06, 2017 -- "Last winter I wasted so much time clearing ice and snow off my windshield," said an inventor from Bellport, N.Y. "My wipers kept getting stuck on my windshield, and when I freed them, they no longer worked properly. I came up with this idea to protect my wiper blades."

He created a prototype for the patent-pending THE WIPER DIAPER to prevent ice and snow from accumulating on wiper blades. The covers keep wiper blades from getting frozen to the windshield. The set saves time and effort when preparing the vehicle for winter travel. The accessories prolong the useful life of wiper blades. Additionally, they are adaptable for use with any new or existing vehicle.

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-LGI-2333, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
