

InventHelp Invention Offers Alternative Way to Check Vehicle Efficiency Levels (OCM-1119)

Pittsburgh-based InventHelp is submitting the MAPLITE to companies in the hopes of their good faith review.

PITTSBURGH, PA ([PRWEB](#)) April 11, 2017 -- Tired of having to use diagnostic equipment to check the health of his vehicle, an inventor from Fontana, Calif., decided that there should be an easier and more convenient way to do this. That's when he came up with the MAPLITE.

This device enables a user to check a vehicle's efficiency levels in a quick, easy manner. It eliminates the need to hook up diagnostic equipment, which saves time and effort. Overall, it helps stay on top of vehicle maintenance.

Compact, versatile and easy to use, the MAPLITE is compatible with all vehicles and ideal for all vehicle owners. The inventor has created a prototype of his idea.

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-OCM-1119, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
