

ULTIMATE PLATE PRESERVER Invented by InventHelp Client (TOR-9664)

InventHelp, a leading invention firm, is submitting the ULTIMATE PLATE PRESERVER to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) April 14, 2017 -- An inventor, from London, Ontario, Canada, thought there needed to be a better way to protect a vehicle's license plate, so he invented the ULTIMATE PLATE PRESERVER.

The patent-pending ULTIMATE PLATE PRESERVER provides an effective way to protect a vehicle's license plate from the harsh elements (fading, UV rays, wind, water, debris). It provides an ultimate seal and ensures that the plate remains clean and visible. In doing so, it helps to prevent damage and fading. As a result, it ensures that the plate remains clean and visible and it provides added peace of mind. The invention features a durable design that is easy to apply so it is ideal for vehicle owners. Additionally, the ULTIMATE PLATE PRESERVER is producible in design variations.

The inventor described the invention design. "I work in the automotive industry, and for years I've seen the substantial amount of damage done to license plates in such so little time. I came up with a practical design and cost-effective solution to prevent such damage."

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TOR-9664, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
