

## **Inventor and InventHelp Client Develops Traction Enhancer for Automobiles (VIG-191)**

*Based in Pittsburgh, Pa., InventHelp is submitting the TIRE SLIP ME NOT to appropriate companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) April 15, 2017 -- "My vehicle has become stuck in deep winter snow and slick ice, and I wished I had a way to get enough traction so that I could get unstuck and moving again," said an inventor from Hampton, Va. "I came up with this portable accessory to provide on-the-spot traction."

He developed the TIRE SLIP ME NOT to provide enough traction for a drive wheel to climb out of a rut or move off a slick patch of ice. The device eliminates the need to dig the vehicle out or ask for assistance with pushing the vehicle. It features a compact, easily portable design that can be stored in the trunk so that it is readily available for use. The accessory allows a stuck vehicle to get back on the road quickly, which saves time and effort. Additionally, the invention offers added peace of mind.

The original design was submitted to the Virginia Beach office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-VIG-191, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
