

## **Avoids Dozing at the Wheel With SLEEP-A-WAY - Designed by InventHelp Client (BMA-4821)**

*InventHelp, founded in 1984 in Pittsburgh, is submitting the SLEEP-A-WAY to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](http://www.PRWEB.com)) May 20, 2017 -- Two inventors from Mashpee, Mass., wants to provide drivers with a safety system that keeps them from falling asleep at the wheel. "Our son was involved in a car accident that involved dozing while driving, so we got to work on an idea for making driving safer if the driver is tired or driving for long periods," said one inventor. "SLEEP-A-WAY is the result."

The SLEEP-A-WAY provides a reliable way to keep a driver from dozing while driving. It's designed to keep his or her eyes open and on the road, which helps prevent injurious or fatal accidents. Overall, it promotes safety and peace of mind.

Compact, ergonomic, easy to use and serving as an alternative to conventional driver-safety products, the SLEEP-A-WAY is ideal for all drivers, especially night workers, babysitters, young drivers, students and people who drive for long periods at a time.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BMA-4821, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
