InventHelp Invention Provides More Convenience at Fast-Food Pick-Up Windows (CBA-3070)

A leading inventor service firm, InventHelp is submitting the CHANGE POCKET to appropriate companies for their consideration.

PITTSBURGH, PA (PRWEB) May 22, 2017 -- Ordering in a fast-food drive-through can be quite convenient, but there's one common blunder that can ruin that. "I've seen so many transactions go wrong at fast-food drive-through windows: receipts, change or credit cards falling between the store and the vehicle, forcing drivers to get out and pick it all up," said an inventor from Hartsville, S.C. "In order to prevent this frustrating hassle, I decided to develop this idea."

The CHANGE POCKET provides more convenience at a fast-food pick-up window. It prevents a receipt and change or a credit card from being dropped between the pick-up window and vehicle window, eliminating the need to get out and retrieve the items. It also promotes safety by preventing pedestrians from being hit by the vehicle, or the vehicle's door from being damaged. As a result, it avoids hassle and frustration.

Ergonomic, easy to use and producible different sizes, colors and designs, the CHANGE POCKET is ideal for all fast-food restaurants or other businesses with drive-through service.The inventor has created a prototype of his idea.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-CBA-3070, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
