

Truck Security Invented for Fishing Accessories - Designed by InventHelp Client (HLW-1771)

Pittsburgh-based InventHelp is working to submit the FISHING ROD SECURITY SYSTEM to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) May 27, 2017 -- An inventor from Davie, Fla., wanted a way to keep fishing rods suspended off of a pickup truck's cargo bed and prevents the theft of an angler's rods and reels when the truck is parked and left unattended. As such, they invented the FISHING ROD SECURITY SYSTEM for use by fishermen. The FISHING ROD SECURITY SYSTEM is designed to keep rods and reels above and off the cargo bed and protect them from damage during transport.

The inventor was inspired by their own experience, "I needed to keep my property safe from theft when I had to leave my truck. The idea came to me when I had expensive fishing rods and reels stolen." The invention provides peace of mind and spares anglers the costs and hassles associated with replacing stolen fishing equipment. It is also easy to use and cost effective.

The original design was submitted to the Miami office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HLW-1771, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
