

## **InventHelp Inventor Designs Safer Vehicle-Window System (WDH-723)**

*InventHelp, based in Pittsburgh, is submitting the Elite Window System to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 03, 2015 -- Window tinting helps maintain proper visibility for drivers, but there are regulations for tinted vehicle windows. Because of this, an inventor from Temple Hills, Md., created the Elite Window System. "I wanted to offer drivers enhanced safety and security, so I conceived of my design," he said.

This system provides an easy way to adjust tinted vehicle windows and provides sharp year-round visual acuity for day and nighttime driving. It also allows for compliance with state regulations. The Elite Window System facilitates simple and gentle recourse in the event of a vehicle theft, as well as enables users and/or passengers to escape quickly if the vehicle is submerged in water. The system is safe, easy, convenient, sustainable from recycled glass, and compatible with all vehicles.

The original design was submitted to the Washington, DC office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-WDH-723, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
