

InventHelp Clients Designed Improved Baby Seat to Promote Convenience and Safety (CBA-2763)

InventHelp, founded in 1984 in Pittsburgh, is submitting the TRANSITIONAL TRAVEL SEAT to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 05, 2015 -- Two inventors from Florence, S.C., wanted to provide a reliable way to avoid getting little girls' dresses wrinkled while they're strapped into carseats. They then expanded it into a better way to secure babies while out and about.

The TRANSITIONAL TRAVEL SEAT provides more convenience when transporting or securing a toddler in a vehicle seat or chair. It avoids the wrinkling of dresses. It also eases transfer from and to vehicles, as well as secures child in a barber or salon chair. Versatile and easy to use, the seat also can be in strollers and highchairs.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-CBA-2763, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
