

Remove Snow More Quickly and Efficiently With the BORA - Designed by InventHelp Client (LGI-2043)

A Pittsburgh-based inventor service company, InventHelp is submitting the BORA to companies in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) November 08, 2015 -- Removing snow is a chore that takes a lot of time and effort, whether it's being done manually or by snow truck. "In order to minimize the difficulty of snow removal, I thought of an alternative method," said an inventor from Middlevillage, N.Y.

The patent-pending BORA is a mobile machine or truck that facilitates the removal of snow. It eliminates the need to do the chore manually. As a result, it saves time, effort and labor costs. Easy to operate and serving as an alternative to conventional snow-removal trucks, the BORA is ideal for municipalities, cities and states.

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-LGI-2043, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
