

## **Portable Pickup Truck Bed Step Invented by InventHelp Client (LCC-3420)**

*Pittsburgh-based inventHelp is working to submit this idea, the TAIL GATOR TAILGATE FAST STEP, to companies for review.*

PITTSBURGH, PA ([PRWEB](#)) June 01, 2017 -- Pickup trucks are extremely handy for tasks that require the transportation of large or numerous items. That being said, it can often be difficult to step in and out of a truck bed when loading it, especially when doing repeated trips.

An inventor from Carlisle, Pa., has invented the patent-pending TAIL GATOR TAILGATE FAST STEP, a portable step for the rear tailgate of a pickup truck that makes it easier to climb in and out of the truck bed. "I was inspired by my own personal experience with struggling to make repeated trips in and out of my truck bed," said the inventor. "My invention makes it easier to step up onto a tailgate and into the truck bed."

TAIL GATOR TAILGATE FAST STEP helps prevent muscle strains and reduces the chance of slipping and falling, providing peace of mind for pickup truck owners. This invention would be especially beneficial for elderly or overweight pickup truck owners. It would also help enhance productivity and job satisfaction for contractors and laborers who regularly use pickup trucks while on the job.

The original design was submitted to the Lancaster office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
