

Special Vehicle System Fights Air Pollution - Designed by InventHelp Client (TOR-9696)

InventHelp, a leading invention firm, is submitting the AUTOMOTIVE ENVIRONMENTAL AIR SCRUBBER to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) June 10, 2017 -- It's no secret that vehicle exhaust is a major source of air pollution, but many societies are so reliant on vehicles that their absence - and even reduction - is hard to imagine. However, an inventor from Oshawa, Ontario, Canada, has imagined a world in which vehicles themselves help reduce pollution. The AUTOMOTIVE ENVIRONMENTAL AIR SCRUBBER is the result of his imagination.

This system enables a driver to participate in the fight against air pollution and work for cleaner air. also, designed to improve a radiator's condition and effectiveness, it doesn't impeded the radiator's airflow or cooling. It also helps to clear smog in major cities.

Compact, long-lasting and easy to use, this system is ideal for all vehicle owners, especially ones who are concerned about the environment. It is designed to be built into new vehicles by manufacturers. The inventor has created a prototype of his idea.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-TOR-9696, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
