

## **Pickup Truck Bed Safety System Invented by InventHelp Client (LCC-3501)**

*InventHelp, a leading inventor service company, is working to submit Side and Hide to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) September 10, 2017 -- PITTSBURGH...An inventor from Bloomsburg, Pa., has developed the SIDE AND HIDE, a quick and easy side rail feature for pickup trucks. It provides the stability needed to resist sliding and movement of bulky materials while traveling.

"I have been hauling heavy loads in my pickup truck for quite some time. My invention will make my life easier, as well with others who have similar professions," said the inventor. The SIDE AND HIDE enables a pickup owner to haul an oversize or bulky load in the bed without risk of items falling. It helps maintain a high level of travel safety for the pickup driver. This may reduce stress and anxiety for the driver and instead offer them peace of mind. This safety system is easy to install and remove. In addition, it is corrosion-resistant and durable for years of effective use.

The original design was submitted to the Lancaster office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-LCC-3501, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
