

InventHelp Inventor Develops Accessory for Finding a Parked Vehicle (LGI-2464)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Car Finder, in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) September 18, 2017 -- PITTSBURGH... "When I park in a crowded lot, I often find it difficult to find my vehicle when it is time to leave," said an inventor from Levittown, N.Y. "I came up with this invention idea to help me be able to locate my vehicle rapidly so that I was not wasting time looking for it."

He developed the patent-pending CAR FINDER to make it easier to locate a vehicle in a crowded parking lot. The unit eliminates the need to waste time looking for the vehicle. It saves time and effort when returning to the vehicle. The accessory allows the vehicle to be seen easily if it is hidden behind a larger vehicle, such as a pickup truck, SUV, etc. It is adaptable for use with any new or existing vehicle. Additionally, the device is designed for ease of attachment and removal.

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-LGI-2464, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
