

Prevent Carbon-Monoxide Danger in Garages/Homes with Invention from InventHelp Client (DLL-3252)

InventHelp, a leading inventor service company, is working to submit CO Safe to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) September 29, 2017 -- After hearing about illnesses caused by cars being left on in garages by accident, two inventors from Hurst, Texas, decided that there should be a reliable way to prevent this dangerous problem.

The patent-pending CO SAFE provides more safety in a garage by preventing dangerous buildup of carbon monoxide (CO). It also keeps CO from spreading into the home, which helps to prevent carbon-monoxide poisoning and fatalities. Featuring an easy-to-use design and producible in design variations, the invention is ideal for all households with garages. The inventors have created a prototype of their idea.

The original design was submitted to the Dallas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DLL-3252, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
