

## **Snow Removal Attachment Invented for Garbage Trucks (HTM-5434)**

*InventHelp, a leading inventor service company, is working to submit Garbage Truck Snow Removal to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 06, 2017 -- Winter weather conditions that bring heavy snowfalls pose a challenge for municipalities and other governmental entities in clearing the roads. Fortunately, an inventor from Waldoboro, Maine, has found an inexpensive and easy way to help users solve this problem.

He developed GARBAGE TRUCK SNOW REMOVAL to provide dumpster-style garbage trucks with the capability of removing snow. As such, it promotes highway safety in snowy weather conditions. Not only does it save time, but it is also cost and energy efficient. Versatile and sturdy, this practical invention is easy to install, use and remove. At the same time, its simple design minimizes production costs. Other appealing features include convenience, effectiveness and an affordable price.

The inventor's personal experience inspired the idea. "When driving on snow-covered roads, I noticed that there didn't seem to be enough trucks with snow plows to clear the roads quickly," he said. "My idea would enable users to add existing garbage trucks to their snow removal fleets."

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HTM-5434, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
