

More Dynamic Set of Wheel Rims Invented by InventHelp Inventor (BTM-2458)

InventHelp, a leading inventor service company, is working to submit A-Wheel to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) October 10, 2017 -- Many people who love their vehicle enjoy showing them off, taking special care to enhance and maintain their aesthetic looks. Wheel rims are a common way of drawing attention to a vehicle, so two inventors from Newark, Del., decided to design a special kind of wheel rim that does this in an optimal manner.

The A-WHEEL provides a more dynamic appearance for a vehicle. It draws attention and improves visibility, which causes the vehicle to stand out. Aesthetic, versatile, easy to use and compatible with all vehicles, the A-WHEEL expresses the owner's personal style.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BTM-2458, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
