

## **Keeps Tire Rims Clean During Tire Dressing with this Invention (SDB-1058)**

*InventHelp, a leading inventor service company, is working to submit Rim Saver to companies for their review.*

PITTSBURGH ([PRWEB](#)) October 20, 2017 -- PITTSBURGH...Many car enthusiasts like to present the rims of their wheels in a shiny, pristine manner. Tired of having to go back over the rims after dressing our vehicle's tires, two inventors from El Cajon, Calif., decided that there should be a more convenient way to perform this task.

The RIM SAVER prevents soiling of a wheel rim during dressing of a tire. It allows for more convenient tire spraying by saving the user from having to wipe rims a second time. As a result, it promotes a good look and peace of mind.

Lightweight, easy to use and producible in different sizes, colors, materials, designs and versions, the RIM SAVER is ideal for car detailers, car enthusiasts and car-wash associates.

The original design was submitted to the San Diego office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SDB-1058, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
