

## **Inventor Develops Steering-Wheel Accessory (BMA-4912)**

*InventHelp, a leading inventor service company, is working to submit Microwavable Heated Steering Wheel Cover to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 25, 2017 -- “I thought there needed to be a way to increase comfort when driving in cold weather,” said an inventor, from Fairhaven, Mass.

The patent-pending MICROWAVABLE HEATED STEERING WHEEL COVER provides an effective way to warm a steering wheel during cold weather. It also can provide cooling comfort during warm weather. As a result, it eliminates the need to grip a cold or hot steering wheel, and it enhances comfort and safety. Also, there's no wait time as with the electric type. The invention features a practical design that is convenient and easy to use, so it is ideal for vehicle owners. Additionally, the cover is producible in design variations.

The inventor described the invention design. “My design offers a simple way to warm up the steering wheel.”

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BMA-4912, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
