

## **Invention Protects Vehicle Interiors from Sunlight and Excessive Heat (ORD-2367)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Coolest Car, to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) October 26, 2017 -- PITTSBURGH...An inventor from Mt. Dora, Fla., wanted to protect the interior of his car from the damaging sun, so he came up with COOLEST CAR to meet this need. "It's much better than conventional reflector boards, since those boards let the vehicle interior heat up to very high temperatures," he said.

The COOLEST CAR protects the interior of a vehicle from sunlight and heat in a reliable and aesthetic way. It helps prevent damage and maintains a cooler temperature. It also eliminates the need for a conventional reflector board, which can bump the rearview mirror.

Lightweight, portable, easy to use/store and producible in different sizes, colors and designs, COOLEST CAR also enhances the look of the vehicle.

The original design was submitted to the Orlando office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-ORD-2367, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
