

Invention Jumpstarts Vehicles More Conveniently (ORD-2400)

InventHelp, a leading inventor service company, is working to submit Positive Start Cable to companies for their review.

PITTSBURGH ([PRWEB](#)) October 27, 2017 -- An inventor from Lakeland, Fla., knows how frustrating it can be to jumpstart a vehicle. When his truck's battery died while it was parked in the garage, it had to be pushed out for jumpstarting. This hassle inspired him to design a more convenient method to jumpstart vehicles.

The patent-pending POSITIVE START CABLE allows for quicker and easier jumpstarting of a vehicle. It eliminates the need to reposition the vehicle, which saves time and effort. Overall, it promotes efficiency, convenience and peace of mind.

Compact, portable, versatile, easy to use and producible in design variations, the POSITIVE START CABLE is ideal for mechanics, towing companies and DIYers.

The original design was submitted to the Orlando office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-ORD-2400, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
