

Inventor Develops Visibility Enhancer for Roadways (HUN-309)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, American Eagle Eyes, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) October 27, 2017 -- "I wanted to prevent avoidable car accidents caused by lack of visibility due to low lighting or adverse weather conditions," said an inventor from Sugar Land, Texas. "To improve visibility on roadways, I came up with this convenient and effective idea."

He developed the AMERICAN EAGLE EYES to offer improved illumination on roadways. The invention makes it easier for drivers to see where they are going. The device ensures that curbs, dividers and other items are easily visible. It helps reduce the incidence of collisions. The accessory enables drivers to see clearly in the event of adverse weather conditions, including rain, snow and fog. All of this is designed to improved roadway safety.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HUN-309, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
