

Inventor Develops Hassle-Free Bumper Sticker (JMC-1989)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, the Original F.O.S. Sticker, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) November 03, 2017 -- "My idea is to take a very popular older product, the standard bumper sticker, and update it so that it is appealing to the 21st Century crowd," said an inventor from Roseburg, Ore. "This will carry the bumper sticker forward to a new generation of motorists."

He developed THE ORIGINAL F.O.S. STICKER to provide a simple and effective way to display a graphic or message on your vehicle. The unit will not damage the paint job, and it can be switched out quickly and easily. The accessory does not detract from the value or appearance of the vehicle. It is suitable for use on both new and existing vehicles. Additionally, the bumper sticker enables the motorist to personalize his or her vehicle.

The idea is patent pending.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-JMC-1989, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
